Reinigung

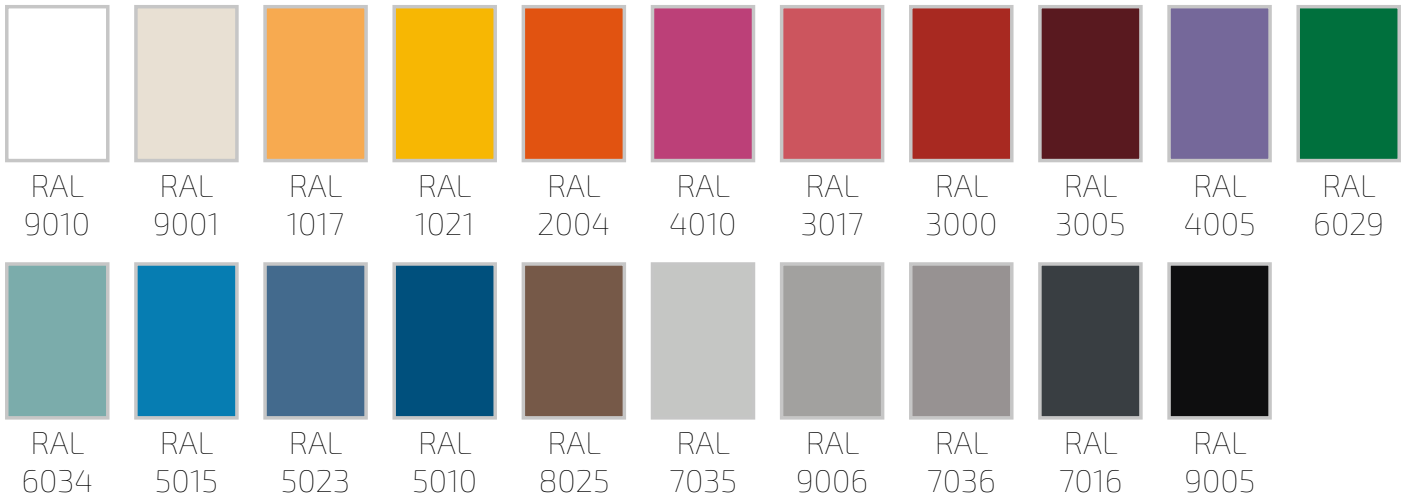

Es kann leicht mit neutralen, nicht aggressiven Reinigungsmitteln wie Glasreinigern, Allzweckreinigern usw. und einem weichen Tuch gereinigt werden. Stahlwolle oder ähnliche Produkte werden nicht empfohlen, da sie die Oberfläche verkratzen und Korrosionslöcher verursachen können. Verwenden Sie keine chloridhaltigen Mittel, da diese Rost verursachen und somit kontraindiziert sind. Salzsäure oder Eisenprodukte sind bei längerem Kontakt ebenfalls nicht zu empfehlen.

SEHR WICHTIG: Nach der Verwendung des Produkts muss es gründlich abgetrocknet werden (mit einem weichen Tuch), da Feuchtigkeit zu Korrosion an den Metallschränken führt.
