CARACTERÍSTICAS

Cacifos série ECO fabricados com chapa de aço laminado em frio, qualidade DC01, segundo a norma europeia EN10130 com um conteúdo em carbono inferior ao 0,12%.

Espessura 0,6 mm.

Tratamento prévio antes da pintura, passivado e desgordurante com fosfatização amorfa.

Secando em forno a 180°C durante 15 minutos.

Pintado com pintura Epoxi-poliéster em pó na cabine de pintura.

Corpo

Pintado cor cinza ral 7035 microtexturado. Espessura mínima de 50 microns.

Prateleira soldada e varão para pendurar cabides na série SV.

Varão para pendurar cabides na série ST.

Inclui patas de aço (espessura 1,5 mm) com proteção de polietileno cor preta.

Portas

Pintadas cor azul ral 5010 microtexturado ou cor cinza ral 7035.

Microtexturado espessura mínima de 50 microns.

Duas dobras no perímetro.

Cantos sem arestas cortantes e dobradiças escondidas.

Com etiqueteiro.

Com ventilação nas série SV, ST, SM, SC, SP, SB e SZ.

Fechaduras com duas chaves.

Com reforço longitudinal na série SV.

Portas em L com reforço longitudinal e dobradiças escondidas (série SL2).

Limpeza

Pode ser facilmente limpo com produtos de limpeza neutros e não agressivos, como limpa-vidros, limpa-tudo, etc., utilizando um pano macio. Não se recomenda a utilização de palha de aço ou produtos semelhantes, pois podem riscar a superfície e criar corrosão. Não utilizar materiais que contenham cloretos, uma vez que são contra-indicados por provocarem ferrugem. O ácido clorídrico ou produtos de ferro em contacto prolongado também não são recomendados.

MUITO IMPORTANTE: Após a utilização do produto, este deve ser bem seco (com um pano macio), pois a humidade provoca a corrosão dos cacifos metálicos.
