CARACTERÍSTICAS

Características técnicas

Fabricação com painel compacto de resinas fenólicas.

Material rígido, hidrófugo, anti-bacteriano e ideal para lugares úmidos.

Altamente resistente ao desgaste, é ideal quando o uso é elevado e a limpeza é freqüente. Núcleo cor preta.

Conforme as normas europeias EN 438-1 e EN 438-2.

Densidade 1450 kg/m³ de acordó com DIM 53479.

Absorção da água menor do 3%.

Painel de 10 mm de espessura no teto, chão, laterais e separações.

Portas

Painel de 12 mm de espessura nas portas.

Cantos arredondados.

Reforço

Resinas fenólicas ranhurado de 4 mm de espessura totalmente enquadrado.

Acessórios

Fechadura de chave com a possibilidade de tirar o cilindro, e fornecido com chave mestre. Com duas chaves de usuário

Patas de PVC reguláveis em altura de 100 a 150 mm.

Varão para pendurar cabides de alumínio com dois cabides de a.b.s. (Modelos FV, FT e FL).

Prateleira no interior de 10 mm de espessura no modelo FV.

Parafusos de aço inoxidável A2 e dobradiças com mola inoxidável A2.

Inclui numeração.

Pés reguláveis em altura de 150 mm.

Uma dobradiça com freio para cada porta.

Não precisa manutenção.

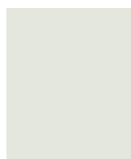

Fácil limpeza do painel fenólico

O painel fenólico tem uma superfície não porosa e repele a sujeira. É fácil de limpar, com detergentes químicos normais ou com produtos desinfectantes. No caso de ter que limpar grafite é possível usar um disolvente orgânico sem risco de alteração na cor. É resistente aos residuos alimentar e aos corantes, porque não afetam nem às propriedades nem na apariência do painel fenólico.

Não é recomendável usar bombril ou produtos parecidos porque podem arranhar a superfície e criar picadas de corrosão. Especial atenção em quanto ao uso de detergentes que tenham cloruro, como por exemplo a cândida, esta contra-indicado porque podem enferrujar. O ácido clorhídrico ou os produtos de ferro em contato prolongado também não estão recomendados. Nunca use limpadores de aço comúm para o aço inox.
